SUMMARY

Full Stack Developer with a Javascript focus. Known for being a problem solver, fast learner, moving up and building relationships with every team member and client. I'm naturally a people person, enjoy exceeding expectations, and a bit of a perfectionist, which is always reflected in my work. I study everything I touch and couldn't stop learning if I tried.

EXPERIENCE

Software Engineering Apprentice - Viking Education

Aug. 2017 to Feb. 2018

Accelerated Training program. Built well-tested production applications using Agile methods and modern tech stacks (JavaScript, Node, SQL, MongoDB, ReactJS.)

SKILLS

TECHNOLOGIES: Javascript, JQuery, SQL, MongoDB, Git, HTML5, CSS3, Sass, Jasmine, Bootstrap, PostgreSQL, Mongoose, AngularJS, ReactJS, NodeJS, Redux, Agile Development

PROJECTS

Backpack

Digital Backpack for storing and using all the wonderful things you find throughout your online adventures. Quicklink Chrome extension for adding content to your backpack with a right-click. Allows for easy organization, replay, and revisiting of previously found content and media without the need of a bookmark.

Techs: ReactJS, Redux, Webpack, Node.js, Express, MongoDB, Google Chrome Extension, Open Graph Scraper, Passport, Bootstrap, Jasmine.

Mimir's Market

E-Commerce web app for purchasing rare novelty items; with search and sort functionality, session-based user cart, and Stripe checkout.

Techs: MongoDB, SQL, Mongoose, Sequelize, PostgreSQL, Handlebars, Bootstrap

ThoReddit

Social news web application for the Viking community to share posts and comments with other users. Functionality for commenting on posts and other comments, upvoting and downvoting of both posts and comments.

Techs: Node.js, Express, MongoDB, Mongoose, Postgres, Handlebars, md5.

Roundabout

Custom Slack app for cross communication and notifications between the current project repo's activities and team members. Notifies relevant team members of issues, assignment of task/issue, task/issue modification and completion, and pull requests.

Techs: Javascript, NodeJS, Slack, Git, Github/GitLab, GCP VM, Webhooks.

Ty-TV

Personal project to allow my 3 year old son to turn on his favorite shows in the morning by himself, allowing me to get an extra bit of sleep. App takes only basic keyboard number input, playing appropriate show from youtube.

Techs: Handlebars, Passport, MongoDB, Bluebird, OAuth
